

Graduate Attributes for WPBL and eWIL

How does your WIL Project relate to Ubuntu:

Ubuntu

Demonstrate your understanding of the needs, values and cultures of people?

Our WIL project focused on a laundry pick-up and drop-off service for residents in Maitland, Woodstock, and Observatory. We considered that people in these areas have different lifestyles and challenges, such as lack of washing machines, busy work schedules, and physical limitations. The solution was designed to be simple, accessible, and suitable for all users.

Demonstrate an example of your interpersonal skills.

I worked closely with my team and communicated regularly through meetings and group discussions. We shared ideas, gave feedback, and supported each other to complete tasks effectively. This helped us work better as a team and stay on track.

Demonstrate an example of your interprofessional skills.

Each team member had a specific role such as researcher, designer, developer, or presenter. Even though our roles were different, we worked together to complete the project successfully and make sure everything aligned properly.

How does your WIL Project relate to Knowing, Technological Capability & Foresight:

Demonstrate an example of how you have used technology and knowledge to effect change in society.

We used web development skills and research to design a service that solves a real community problem. The project shows how technology can be used to improve daily life by making laundry services more convenient and accessible.

How does your WIL Project relate to Resilience & Problem-Solving Capability

Demonstrate an example of how you confidently engage in solving complex problems in society.

We identified that many residents struggle with access to laundry facilities. To solve this, we created a laundry pick-up and drop-off service that reduces travel time and physical effort.

Demonstrate an example of your perseverance in the face of obstacles, failures, challenges.

We faced challenges such as time management and balancing other assignments, but we stayed focused and completed the project through teamwork and consistent effort.

Demonstrate an example of organisational and financial skills.

We used Agile planning to organise tasks and manage deadlines. We also considered affordability in our business idea to ensure the service would be practical for the target community.

Demonstrate an example of entrepreneurship, innovation and research.

We conducted a survey to understand user needs and based our solution on the results. This helped us design a practical and innovative service that addresses a real problem in the community.

How does your WIL Project relate to Ethical Capability & Respect

Demonstrate an example of how you use your moral values to make ethical decisions.

We made sure our project was fair, respectful, and inclusive. We also handled survey responses responsibly and used the data only for academic purposes.

Demonstrate an example of how you acted on unethical practices.

When issues came up in the group, we addressed them respectfully and communicated openly to find solutions instead of ignoring problems.
